

# WALKING-WORKING SURFACES

Quick Reference | Field Staff

---

## BEFORE YOU START

- Inspect walking surfaces for hazards
- Check for wet, oily, or cluttered areas
- Verify guardrails/covers are in place
- Report damaged floors, holes, or grates
- Ensure adequate lighting

## HOUSEKEEPING

- Keep aisles and exits clear
- Clean spills immediately
- Store materials properly
- Use designated walkways
- Secure cords and hoses across paths

## Notes:

---

---

---

---

## LADDER SAFETY

- Inspect before each use
- Maintain 3 points of contact
- Set on stable, level surface
- Do not exceed rated capacity
- Face ladder when climbing

## FALL PROTECTION

- Required at 4 ft (general) / 6 ft (construction)
- Guardrails, safety nets, or PFAS
- Inspect harness and lanyard daily
- Anchor to rated tie-off point
- Never alter fall protection equipment
